Welcome to an opportunity to recover what was lost in years past. Yes, recover a chance to have a positive academic standing, by re-entering school and earning a high school diploma. As you have found, a high school diploma is imperative in today’s world. It enables you to get a job, pursue goals that require more than a basic education and qualifies you for vocational schools, college admission and possible student aid, to cover some of the costs. It can change your earning power significantly over a lifetime, open up serious career opportunities and allow you to reach the goals you had so long ago.

Parkridge Private School has offered our Adult Diploma Program as a community service since 1987. Adults, who have found themselves in the difficult position of being a high school dropout, now move forward with confidence and commitment to a successful future. The benefits have been priceless as we recount the hundreds of students who have found success over the years.

Parkridge meets the high standards of regional accreditation through Northwest Accreditation Commission (NWAC) a division of AdvancED, who accredits over 30,000 schools in the United States. Our program is aligned to the California State Standards and satisfies the 220 credits required by the State of California in both core and elective content areas. This program is personalized to the needs of the learner.
